SUMMARY

Technical Business Analyst with 4 years of experience in software implementation, system configuration and deployment automation. Technical Proficiency in C#, MSSQL, Python, and Data Analytics with a proven track record of optimizing workflows and improving reporting efficiency. Stakeholder Management with cross-functional teams to deliver scalable, client-focused digital solutions that enhance operational performance. Hands-on expertise across SDLC, UAT and production environments for global clients.

TECHNICAL SKILLS

Implementation & Methodologies: SDLC Management, Agile/Scrum, CI/CD Pipelines, System Configuration, Azure DevOps, GitHub, Jira, Requirement Gathering.

Programming & Frameworks: C#, .NET Core, Python (Pandas, NumPy), REST APIs, LINQ, JavaScript, HTML5, CSS3.

Data Engineering & Architecture: SQL Server (MSSQL), T-SQL (Stored Procedures, Views, Functions, Triggers), ETL Pipelines, Data Warehousing, JSON, XML.

Business Intelligence & Analytics: Power BI (DAX, Power Query), Advanced Microsoft Excel (VBA/Macros, Data Modelling), Data Visualization, Statistical Analysis.

EXPERIENCE

Technical Business Analyst – TELUS Digital Solutions | *June 2026 – Present*

- Led and mentored a team of 4+ analysts, delegating technical workflows, driving sprint deliverables, and improving team task execution efficiency by 25%.
- Engineered end-to-end automation solutions using C# and SQL, reducing manual data processing time by 50% across core client accounts.
- Partnered directly with key US & Canada stakeholders to gather, refine, and translate complex business requirements into technical execution roadmaps.
- Designed and deployed advanced analytics models using Python and Power BI to monitor operational KPIs, driving data-backed strategic decisions.
- Supervised cross-functional UAT workflows across multiple deployment cycles, achieving a 98% on-time release rate with zero critical post-launch bugs.

Associate Technical Business Analyst – TELUS Digital Solutions | *Feb 2023 – June 2026*

- Developed, scaled and deployed C# logic to deliver customized client requirements, engineering robust data extraction, cleaning, validation, and transformation processes.
- Automated template generation by manipulating SQL and XML datasets, analyzing structured business data to support operational needs and improving overall data accuracy by 35%.
- Built automated Power BI dashboards and Excel reports, reducing manual reporting effort by 40%.
- Interfaced with 5+ cross-functional stakeholders across US and Canada to deliver quantified business insights.
- Executed UAT for 5+ releases, reducing post-release issues by 12% using Azure DevOps, ensuring data consistency post-release.

PROJECTS

Automated Query Resolution System

- Developed an NLP-based conversational assistant architected to process 100+ concurrent queries with <2s latency.
- Designed REST APIs (5+ endpoints) using Flask to support production-ready backend integration.
- Processed 1M+ rows of operational data across 3+ reports, resolving voice queries with <2s response latency.

Operational Performance Dashboard

- Designed Role-based Power BI dashboards to monitor KPIs and business performance metrics.
- Processed and cleaned large datasets using Pandas and NumPy.
- Generated insights that influenced weekly business reviews and operational planning.

EDUCATION

Graphic Era University, Dehradun | Master of Computer Applications (2024-26)

United Institute of Management, Prayagraj | Bachelor of Computer Applications (2020-23)

CERTIFICATIONS

- IBM Data Science Professional Certificate
- MSSQL Certification
- Azure DevOps Certification
- Microsoft Excel Certification
